The trailer features a large amount of footage from the film, and it's packed full of those now-famous faces: Tolkien, Martin Freeman, Cate Blanchett, Ian McKellan, Elijah Wood, and many more. The movie has been out for a few months already, and even as I say that, I can't help but wonder how this one will play as a whole. *The Hobbit: The Desolation of Smaug* has been surprisingly popular so far, and while some of that could be due to Peter Jackson's still-in-progress *The Hobbit: An Unexpected Journey*, I'm sure there's also a healthy amount of interest in this movie as a whole. For that reason, the trailer provides a nice bit of information to chew on, as well as giving a chance for all of those actors to go through the motions of playing a cinematic version of the characters. It's nice to see the older cast members return to the big screen, and it's fantastic to see the newer actors try their hand at the characters. Peter Jackson is an amazing director, and even with some clunky pacing and overly lengthy moments, I'm eager to see what he comes up with next.Q: How to get links from the text of a website I have an XML file with some data inside.
